COMPLIANCE WITH THE DASMA THERMAL PERFORMANCE PROGRAM

The DASMA Thermal Performance Verification (TPV) Program certifies and verifies the thermal performance ratings of sectional door products using third-party testing and inspection. The U-factor testing standard for garage doors, ANSI/DASMA 105, provides repeatable and reproducible results. U-factor tests an installed assembly to assign a value that accounts for section joints and perimeter seal.

Models in this program will be identified by this icon
